2. Importance

Please carefully follow the guidelines below before using this induction cooker:

1. Do not handle plug or appliance with wet hands.
2. Do not plug into a socket where several other appliances are plugged in.
3. Do not use if the plug cord is damaged or the power plug does not fit the socket safely.
4. Do not modify the parts, or repair the appliance by yourself.
5. Do not use this appliance near flame or wet places.
6. Do not let children touch when using this appliance, or allow children to use the appliance by themselves.
7. Do not place on unstable surfaces.
8. Do not move this appliance when the pot or the pan is on it.
9. Do not heat an empty pot or overheat the pot.
10. Do not place metallic objects such as knives, forks, spoons, lids, cans, and aluminum foil on the top plate.
11. Ensure that there is sufficient space around this appliance for heat dissipation. To prevent overheating and fire, do not cover it or place objects around them.
12. Do not use this appliance on carpet or tablecloth (vinyl) or on any other low-heat-resistant article.
13. Do not place a sheet of paper between the cookware and the appliance. The paper may get burnt.
14. If the surface is cracked, please switch off and take it to the service center immediately.
15. Do not block the air intake or exhaust.
16. Do not touch the top plate right after removing the pot or the pan, as the top plate will still be very hot.
17. Do not use this appliance near objects that are affected by magnet, such as radios, televisions, credit cards, and magnetic tapes.
18. The power cord must be replaced by qualified technicians.
19. The appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
20. The temperature of accessible surfaces may be high when the appliance is operating.

Warning: Children should be supervised to ensure that they do not play with the appliance.

3. How to Use

4. Troubleshooting

1. Disconnect plug and wait until the unit is cooled down completely. Clean after every use.
2. If the pots/pans are used without being cleaned, it may cause discoloration or get on stains.
3. Do not use benzine, thinner, scrubbing brush or polishing powder to clean the induction cooker.
4. Please clean the surface with a damp cloth and a detergent.
5. Please see vacuum cleaner to suck dust dirt from the air intake and exhaust.
6. Never run water over the unit (this will water gets inside, it may cause malfunction).

5. How to Clean

1. Connect power plug, it makes a “beep” sound. All indicator light will be flash once, which represent the induction cooker is under “standby mode”. Pressing the ON/OFF key once, three LEDs above SELECT key start flashing, press SELECT key once. After cooking, pressing “ON/OFF” button to switch off the appliance. Turn off the appliance when the fan is stopped.

2) “SELECT” selection

a. Power Setting: Place the pans in the centre of stove-top. Pressing “ON/OFF” button, the power indicator lights up. Pressing “SELECT” button, the induction cooker start to work, the display shows “5.0”. Pressing + and - to adjust the power (Total of 15 power levels for choice).

b. Temperature Setting: Pressing the “SELECT” button again, Temperature indicator lights up and the display shows “320°F”, that means the temperature is 320°F. Pressing + and - to adjust the temperature (From 140°F-460°F for choice).

3) Timer Setting: Pressing the “TIMER” button when the appliance is operating, Timer indicator lights up and the display shows “0”. Pressing + and - to adjust the timer. Increase 1 min by each press. The maximum adjustable time is 170 mins.

4) “LOCK” setting

Pressing the LOCK button, the induction cooker will lock all the function except turn off function. If you want to Unlock, press the Lock button again and hold your finger until it makes a sound “beep”. If you want to reactivate when locked, you have to unlock it then every button can work normally.

5) The induction cooker will shut off automatically if there is no any operation within 2 hours when the appliance is not set a timer above 120 minutes.

6) The temperature of accessible surfaces may be high when the appliance is operating.
